01 PROFILE

Frontend developer with hands-on experience building and deploying responsive, production-ready websites — including a complete e-commerce platform with an admin dashboard and a hospital appointment system. Pixel-perfect Figma/PSD to code conversion and a 5.0-star client rating on Fiverr. Pursuing a BS in Artificial Intelligence (2027), combining web development with Python and machine-learning coursework. Seeking a junior frontend role (remote) where clean code, modern UI and fast performance matter.

02 EXPERIENCE

Frontend Web Developer

Nov 2025 — Present

Self-Employed · Freelance (Fiverr) — Remote

- Develop responsive frontend websites with HTML, CSS, JavaScript, Tailwind CSS and Bootstrap for local and international clients.
- Built landing pages, e-commerce interfaces, appointment systems and real-estate listing platforms.
- Implemented search, filters, forms, local-storage data handling and admin-panel functionality.
- Deployed and maintained projects via GitHub and Vercel — 5.0-star seller rating, all-positive reviews.

03 PROJECTS

H-Shop — E-Commerce Platform

2026

Online store with product management, cart, checkout, inventory, ratings, analytics and a complete admin dashboard.
